

7th Grade Geometry Terms

1. Angle less than 90 degrees **acute angle**
2. Distance around a circle **circumference**
3. Triangle with exactly two equal sides **isosceles triangle**
4. Angles that add up to 180 degrees **supplementary angles**
5. Distance around a rectangle **perimeter**
6. Angle greater than 90 degrees **obtuse angle**
7. Line from the center of a circle to a point on the circle **radius**
8. Three sided Polygon **triangle**
9. Line through the center of a circle connecting two points on the Circumference **diameter**
10. Triangle with three unequal sides
11. Four side Polygon **quadrilateral**
12. Angle that equals 90 degrees **right angle**
13. Two angles having the same measure **congruent**
14. Angles that add up to 90 degrees **complimentary angles**
