

GRADES 1-3

A mystery number has two digits. It is an odd number less than 50 but greater than 45. How many possible mystery numbers are there?

Greg made 4 snowballs on Monday. He made 9 snowballs on Tuesday. He made 14 snowballs on Wednesday. How many snowballs did Greg make on Thursday, Friday and Saturday?

Sam has 25¢ in his pocket. He has more than one coin, but less than 8 coins. What combination of coins might Sam have in his pocket?

Look at the first two triangles to see the pattern and fill in the missing number at the top of the third triangle.
